

Power Blue Mix

Dairy Farming

Visible and powerful product based on high concentration of chlorine dioxide

Power Blue Mix

Visible and powerful product based on high concentration of chlorine dioxide

ADVANTAGES

- Post milking disinfectant with rapid and powerful effectiveness: bactericidal, yeasticidal and virucidal
- High visibility thanks to sustained marking color
- Controlled consumption

Colour

PACKAGING:
2*2L, 2*10L, 22L,
60L, 220L, 1000L
IBC

TEAT PROTECTION

Power Blue Mix is enriched with 4 types of cosmetic agents:

- Humectant agents: maintain the natural moisture of the skin
- Emollient agents: soften the superficial layers of the skin
- Softening agents: maintain elasticity and reduce the risk of cracking
- Moisturizing agents: increase the water content of the skin

TEAT DISINFECTION

- **Bactericidal**, effective in **30 seconds** against *Escherichia coli*, *Staphylococcus aureus*, *Streptococcus uberis* (EN 1656)
- **Yeasticidal** in **30 seconds** on *Candida albicans* (EN 1657) and *Prototheca*
- **Virucidal** in **5 minutes** on ECBO and enveloped viruses, *Orthopoxvirus* (EN 14675)

DIRECTION FOR USE

- Power Blue Mix is produced by mixing **on equal parts (v/v) Power Blue Mix base and Power Blue Mix activ'**.
- Shake well the mixture before using to obtain a homogeneous solution (blue).
- Apply by dipping on full length on the teats and leave the product until the next milking.
- Power Blue Mix must be prepared for a **maximum of 2 milking to ensure its effectiveness.**

MAIN COMPONENTS

Active(s) substance(s) per 100g of product : Chlorine dioxide 0.0583g + Lactic acid L-(+)- 2.663g

Other components: humectant, emollient, moisturizer, softener, film viscosity-forming agents, surfactant and colouring agent
