based on organic acids  
combination**

# Glycolac Foam

High quality pre-milking foam for teat preparation based on organic acids combination

## ADVANTAGES

- Qualitative foam : dense, covering and homogenous for optimal pre-milking preparation
- Quick biocidal action thanks to lactic and glycolic acids
- High skin conditioning properties

## TEAT PROTECTION

- Glycolac Foam facilitates teat preparation thanks to foaming and wetting agents.
- Glycolac Foam contains glycerin, aloe vera providing moisturizing, emollient and softening properties to teat skin. This provides ideal conditions for teats before milking.

## TEAT DISINFECTION

- Glycolac Foam is composed with a new disinfecting combination: lactic and glycolic acids. These two active substances are two naturally- occurring molecules in living organisms.
- Glycolac Foam is **bactericidal** on *Escherichia coli*, *Staphylococcus aureus*, *Streptococcus uberis* in **30 seconds** (EN 1656).
- Glycolac Foam is **yeastcidal** on *Candida albicans* in **1 minute** (EN 1657).

## DIRECTION FOR USE

- Glycolac Foam is ready-to-use product
- Create the foam thanks to a foaming cup and apply the product along the entire teat before milking. Leave it on teats for 1 minute.
- Carefully wipe the teats with a paper towel or a clean cloth before attaching the milking cluster.

## MAIN COMPONENTS

Active substances per 100g of product : glycolic acid : 0,56g + L (+)  
lactic acid : 2g.  
Contains skin conditioning agents.
